Sales and Service

No.25-10E

Change in Appearance of Linear Servo Motor Primary Side

Thank you for your continued patronage of the Mitsubishi Electric AC servo system. The appearance of the linear servo motor primary side will be changed as follows. This change does not affect the functions and performance of the products.

1. Target Model

The primary side (coil) of all models of the linear servo motor LM series

* Excluding the LM-U2 series primary side (coil).

2. Reason for the Change

Production discontinuation of the rust inhibitor currently used

3. Details of the Change

Because of the change of the rust inhibitor, the appearance of the rust inhibitor application area shown in the following table will be changed.

Series	Rust inhibitor application area	Before	After
LM-H3P LM-K2P	Details of the appearance before and after the change are shown on the right. Opposing surface of the secondary side		
LM-FP	Details of the appearance before and after the change are shown on the right. Mounting surface at customer's site		

^{*} The photos above show representative models.

4. Schedule

This change will be made sequentially from the May 2025 production.

Depending on the stock status, the schedule may be advanced or delayed. There may be cases where both the former and new products exist in the distribution stage.
