

Mitsubishi Electric AC Servo System

Sales and Service

No.25-21E

Change in UL Mark Indication of AC Servo Motors

Thank you for your continued patronage of the Mitsubishi Electric AC servo system.
The UL mark indication of AC servo motors will be changed.

1. Target Model

- Rotary AC servo motors
- HK-KT series, HK-MT series, HK-ST series, HK-RT series, HK-KN series, HK-FN series, and HK-SN series
- Direct drive motors
- TM-RG2M series, TM-RU2M series, and TM-RFM series

2. Details of the Change

The UL mark will be changed from cRUus (U.S. and Canadian certification) to RU (U.S. certification only).
This change does not affect the functions and performance of the products.

Before	After
	

* The images are presented as examples only.

3. Background

A factory inspection conducted by Underwriters Laboratories Limited Liability Company found that the lead wires used in the target models are compliant only with RU (U.S. certification) requirements but not with cRUus (U.S. and Canadian certification) requirements.

4. Schedule

This change will be made sequentially from the July 2025 production. There may be cases where both the former and new products exist in the distribution stage.

5. Future Action

For the target models, the cRUus mark will be displayed on the products again after the lead wires are compliant with cRUus (U.S. and Canadian certification) requirements.
